FLUID

Sit Smart, Work Fluid

Meet the fluid office chair, your perfect partner in productivity and comfort. Engineered to support your body's natural posture, this chair combines sleek design with advanced ergonomics to keep you comfortable all day long. Featuring different adjustable features, the fluid chair adapts to your unique needs, providing personalized comfort with every use. Whether you're tackling deadlines or brainstorming your next big idea, the fluid chair ensures a healthier, strain-free work environment, empowering you to stay focused and achieve more.

Sleek and Airy Design:

Fluid chairs feature a minimalist design that gives a sense of lightness, preventing a cluttered look in the workspace.

Ergonomic Support & Safety Features:

Designed for comfort and safety, Fluid chairs support healthy posture with adjustable features to reduce strain, certified with BIFMA x 5.1

Versatile Customization Options

The chair offers easy add-ons like adjustable armrests and lumbar support, allowing for personalized comfort.

Fluid chair is crafted to seamlessly blend aesthetics with functionality, ensuring optimal workspace comfort and overall well-being. They stand as a testament to AFC’s commitment to being your trusted partner in ergonomic seating solutions.

Armrest

The 3-way adjustable armrest offers a 60mm height range and allows the armpads to move forward, backward, and swivel into 3 positions, ensuring comfortable arm support. Made from 100% recyclable polypropylene.

Backrest

The backrest uses breathable polyester mesh suspension for improved airflow, ensuring thermal comfort. It’s made from 100% recyclable fiber-reinforced polyamide material.

Lumbar Support

The lumbar pad provides additional back support and can be easily added without tools. It’s made from 100% recyclable polypropylene with cushioning for comfort.

Chair Mechanism

The chair features an auto weight-sensing tilt mechanism, with optional multi-lock or single-lock functions. It includes a seat slide up to 60mm and adjustable height (100mm range), ensuring ergonomic support. It is BIFMA compliant for safety.

Base

The standard base is made of Nylon 6 with 30% glass fiber for durability. An optional base of die-cast chrome or 2mm thick ERW steel provides a weight-bearing capacity of up to 800kg.

Castors

The twin-wheel nylon castors have a 60mm diameter, with a pin-type attachment that interlocks into the base for easy movement and stability.

Designed to provide personalized support and effortless comfort, keeping you productive and at ease throughout the day.

TILT BACK MECHANISM

Fluid is using Auto Weight-Sensing synchro-tilt Mechanism with 3-step angle adjustment
